March, 26 11.00	<b>“Creation of a unified educational environment of the gymnasium for the development of children with different types of giftedness”</b> Multilevel programme	The school, being an important element in the system of continuous education, cannot ignore the needs of society in the development of students' creativity and the search for gifted children when forming a social order. Simultaneously with the implementation of the standard of general education, we are building a system of search and support for gifted children in different directions, as well as their support throughout the period of personality formation. In this direction, the gymnasium already has some positive experience. Integration of long-term and extracurricular activities, additional education gives students the opportunity to build an individual educational route. Conditions for successful activity of the pupil in various directions are created. We have	Gimnasium No. 42 of Primorsky District. ul. 		exchange experiences and views on strategies and approaches to the implementation of the objectives related to the seminar's problematic. We will think about what the school of engineering thinking is, what methods this thinking is formed, how to evaluate the effectiveness. We will talk about the possibilities of project activities in primary and secondary education, the role of social partnership, the study of robotics in different age groups and with different resources.			
27.03.2019 10.00	<b>"Digital education- engineers of the future»</b> Seminar	The seminar is devoted to the questions of formation of the digital environment in the institution of additional education for children. We will consider new approaches and requirements to the software and methodological support of the educational process, the ways of forming engineering thinking, engineering design and modeling in additional education will be discussed. We will discuss networking and its role in shaping the digital environment. Participants of the seminar will be able to attend master classes (formation of engineering competencies, publishing on the computer, design technologies, network interevent), see an exhibition of students' works (computer graphics), presentations of children's projects (robotics, aircraft and ship modeling). We will demonstrate how distance education works. We will show interesting thematic areas of training (3D modeling, TIPS, robotics, ship and aircraft modeling, etc.)	House of Children's Creativity Frunzensky district, Budapeshtskaya st., 30/2, «Mezhdunarodnaya» Metro station	Sharova Elena Pavlovna <a href="mailto:mail@ddut.ru">mail@ddut.ru</a>  Pre-registration as a conference participant is required on the website <a href="https://conf.rcokoit.ru">https://conf.rcokoit.ru</a> Registration will be opened on March 15, 2019 as for an event with a limited number of places for participants.	
03/27/2019 10.00 AM	<b>Formation of a digital educational environment in the conditions of building of an information society</b> Seminar	The idea of the seminar is related to the formation of a digital educational environment in the gymnasium. This is an urgent need, as we are obliged to prepare a comprehensively developed graduate, ready to continue education and to live in a highly developed information society. At the seminar we will deal with the concept of "digital environment", discuss issues related to the search and use of modern means of forming of a digital educational environment, organizing the interevent of all participants in the educational process using the digital educational environment of the	Gymnasium № 528 of Nevsky district, 41, building 2 Kollontai St. "Prospekt Bolshevikov" metro station	Dmitry Vasilyevich Konovalov kon-dv@gimn528.ru  Pre-registration as a conference participant is required at <a href="https://conf.rcokoit.ru">https://conf.rcokoit.ru</a> The registration will open on March 15, 2019, as the number of places for visitors is limited.	

		educational institution, analyze the requirements for teacher competence. The student's subject interactive tools will be demonstrated.			
03/27/2019 1.00 PM	<b>Information technology as a multifunctional resource for the development of additional education</b> Seminar	The seminar is designed for headmasters, deputy head teachers, heads of additional education departments, methodologists, additional education teachers interested in finding new ways of organizing, managing and implementing supplementary education based on information technologies that form a new multifunctional educational environment. The seminar will consider the following issues: the essence of a multifunctional educational environment based on information technologies, including the multifunctionality of educational programmes being implemented, the principles of modeling the multifunctional educational environment of an institution, the information technology capabilities of recording and analyzing individual pedagogical achievements and individual results of students' mastering the programmes (including metadisciplinary programmes), problems and tasks of management in new conditions. The work of project groups in the hackathon format will be organized. Participants will get acquainted with an interactive exhibition demonstrating the possibility of incorporating modern information technologies in the implementation of the content of additional education of children.	"Start +" center of technical creativity of Nevsky district 11-A Ivanovskaya St., "Lomonosovskaya" metro station	Marina Gennedievna Evdokimova <a href="mailto:cttstartplus@gmail.com">cttstartplus@gmail.com</a> <a href="mailto:evdokia@bk.ru">evdokia@bk.ru</a>	Pre-registration as a conference participant is required at <a href="https://conf.rcokoit.ru">https://conf.rcokoit.ru</a> The registration will open on March 15, 2019, as the number of places for visitors is limited.
03/27/2019 1.00 PM	<b>The MOST system of internal corporate training</b> Seminar	During the seminar, participants will be able to get acquainted with the system of internal corporate training in pre-school educational institutions. The system is called MOST and consists of blocks that cover all parties of the educational process. We will demonstrate the capabilities and content of the basic units of the system. The SOVA block is a psychological and pedagogical training aimed at the prevention of professional burnout of a teacher. The ARTIST block includes modern methods and techniques for the interevent of all participants of educational relations. The VIP block presents training workshops, seminar-workshops, round tables for teachers. The "Electronic Money Box" block is an education and training centre on the	Combined-type kindergarten № 27 of Nevsky district. 15 building 3 Krylenko St., "Ulitsa Dybenko" metro station	Maria Aleksandrovna Blinkova <a href="mailto:linkova.ru@yandex.ru">linkova.ru@yandex.ru</a>	Pre-registration as a conference participant is required at <a href="https://conf.rcokoit.ru">https://conf.rcokoit.ru</a> The registration will open on March 15, 2019, as the number of places for visitors is limited.

		Internet. We invite our colleagues to get acquainted with the work of the system and with the results of its use.			
03/27/2019 10.00 AM	<b>Laboratory of projects 169: experience of using free software and hardware in creative educational projects</b> Seminar	The seminar will present the school's experience in organizing project activities using modern engineering-oriented technologies. We will discuss important issues related to the content of additional education programmes, visual programming environments as a means of modeling physical processes, microcontrollers as a means of project activities, 3D printing as a means of technological support for project activities. Particular attention will be paid to the use of project activities to motivate students' cognitive activity, to the gamification of the educational process. Robotics, design and development of desktop and computer games, 3D modeling - all these areas create conditions for the integration of engineering technologies into training courses and the implementation of modern metadisciplinary projects. We will show how modern technical and software tools work. Seminar participants will be able to attend two master classes and an exhibition of children's projects. 		those learning situations in which their use is effective and useful.			
03/27/2019 14.00  SPb Center for Education Quality Assessment and Information Technologies	<b>Industry 4.0 in the modern educational space</b> Discussion session	We live in the era of the fourth industrial revolution - Industry 4.0. Big data, the “Internet of things”, robotization, virtual and augmented reality, 3d-prototyping, digitalization of various spheres of human life are actively implemented today, and this forces the education system to go to a new level of tasks. Our institution is an institution of additional education. But we are not focused only on the development of computer technology. We can deal with children who are passionate about drawing, clothing design, theater, modern media, journalism and much more. All of our programmes include the idea and practice of digitalization. Design solutions are embodied on the computer, and then transferred to real embroideries or models of clothes. Those who want to try themselves in journalism can not only write, shoot, speak, but also master the technical processes of modern media. In our 4d theater, stage skills, movement, speech are taught, but our scenery is from the world of 4d. Our programmes are diverse, they can satisfy almost any children's interests, and the common basis for them is a “figure” - something that allows children to be introduced to the standards of the modern world. We are looking for ways and approaches to solving vocational guidance problems, creating conditions for social partnership - with school, with business, with science. At the session, we will acquaint participants with interesting teachers, with the equipment that we use for training sessions, talk about the mechanisms of networking and public-private partnership to create a modern high-tech environment.	St. Petersburg Academy of Digital Technologies, 29/2 Bolshoy Prospekt PS, Chkalovskaya, Petrogradskaya metro stations	Ekaterina Viktorovna Litvinenko <a href="mailto:litvinenkoev@adtspb.ru">litvinenkoev@adtspb.ru</a>  Pre-registration as a conference participant is required at <a href="https://conf.rcokoit.ru">https://conf.rcokoit.ru</a> The registration will open on March 15, 2019, as the number of places for visitors is limited.	
03/27/2019 10.00 AM  SPb Center for Education Quality Assessment and Information Technologies	<b>Development of effective means of communication between participants of the educational process</b> Seminar	The issues of the seminar are related to the capabilities of information technology in working with various target groups of participants in the educational process. We will analyze the role of ICT in accompanying social design (cultural practices), supporting children's movements, providing educational and research and investigation activities (student research society). A business game "Testing criteria for evaluating the	Secondary School No. 564 of the Admiralteisky district, 24 Egorova St, "Tekhnologicheskyy Institut", "Frunzenskaya" metro stations. 03/27/2019 10.00  Vyborgsky district	<b>From the design engineering to robotics: forming of the future in the kindergarten</b> Master class	Quality evaluation of approbation of the partial programme "From Fröbel to the robot: we grow future engineers" in the framework of The work of the Federal Network Site provides for the implementation of certain stages. The preliminary stage of entry into the programme has confirmed that the educational organization has grounds for its more successful implementation.	Kindergarten № 91 of Vyborgsky District, 15, building 1, Poetichesky Boulevard. "Ozerki", "Prospekt Prosvescheniya" metro stations.	Olga Yurievna Odintsova (812)559-50-03 <a href="mailto:d091@shko.la">d091@shko.la</a>	Heads of PEI, assistant managers of PEI, methodologists, educators

		<p>Some of these grounds are the conduction of a focused informative and research children's activities and the accumulated scientific and methodological potential in this direction. The results of the diagnosis confirm that the competent implementation of the main educational programme is a successful prerequisite for the development of a partial programme. This partial programme does not require additional time and methodical expenses, if the child reads the schemes and creates his own ones, knows how to plan his activities in accordance with the design is able to evaluate the result and each of the stages of his work to achieve it, sees causal relationships easily and chooses adequate methods of event from previously mastered ones, participates with interest in research, constructive activities, offers his own design ideas, etc. It is obvious that the conditions for the successful implementation of "From Fröbel to the robot: we grow future engineers" partial programme, much more. In the framework of the Forum, we are ready to demonstrate the possibilities of using games with logical and mathematical content in testing this programme and how this contributes to the creation of conditions and ensuring the child's development trajectory from the development of technical awareness, to their technical readiness</p>
